

## Drone footage

To preserve the integrity of the historic monument, guarantee the safety and security of our visitors, and protect the surrounding flora and fauna, the use of drones is strictly prohibited on Chillon Castle grounds.

Furthermore, in accordance with guidance from the [Swiss Federal Office of Civil Aviation](#) (FOCA), unmanned aircraft are prohibited from flying within the Grangettes Nature Reserve. As an internationally significant resting and hibernation spot for numerous birds, this is a protected area.

The Swiss Ornithological Institute has found that aircraft can threaten the survival of bird species and their ability to reproduce.

In exceptional circumstances, specific authorisation may be granted by Chillon Castle management, subject to strict predetermined conditions. Requests must be made in writing to info@chillon.ch at least two months in advance.
